

Legacy Roundtable Accelerated Summer Mathematics Academy

2016 Enrollment Limited to First 100

“Focusing on Excellence”

Legacy will focus renewed recruitment efforts in the Riverside and Perris regions of the Inland Empire where the number and proportion of African American males performing at Basic, Below Basic and Far Below Basic levels on state math standards is sometime five times higher than other ethnic counterparts at their schools. Legacy Roundtable works to inspire and equip these scholars to seek excellence in mathematics and all other subjects required for college admissions after high school graduation. Online registration materials and required forms are available at legacyroundtable.com.

Legacy Roundtable was inspired in 2004 and enters its 12th year with the Summer 2016 class. Legacy Roundtable has committed to continuing math acceleration efforts until the day 500 African American males are taking Calculus during the same semester in the Inland Empire and San Gabriel Valley service area. The program plans to serve 100 African American males currently in 7th through 11th grades this year.

Summer 2016 ASMA classes will include a continued focus on Intermediate Algebra and more challenging math courses through Calculus. Students will take community college level classes that replace a “full-year” of high school requirement in order to enroll into more rigorous math courses upon return to school in fall 2015. **During the first phase of the program, scholars receive three months of math tutoring on Saturday mornings taught by Legacy Roundtable tutors February through May 2016.**

Scholars get math assistance during the February through April period on their current math classes as well as assistance with preparation for the Community College Math Assessment Test at Saturday sessions conducted at UC Riverside. Results of this community college assessment test determine which community college courses a student may enter for credit. The summer courses can be taken at partner campuses: Mt. SAC, Chaffey College, Moreno Valley, Norco College, Riverside City College and Mt. San Jacinto Community College. Scholars may also elect to complete summer courses at their regular schools or use online math courses sponsored by CSU San Bernardino and Chino Unified School District. Scholars at the community college sites are supported daily by Legacy sponsored tutors stationed at their campuses.

Legacy Roundtable has made a commitment of enrolling 500 African American males into Calculus within the Inland Empire and San Gabriel Valley—all in the same year. Legacy pledges to ensure that each of these scholars is competitively eligible for top colleges and universities throughout California and the nation if they continue habits gained through participation and use college preparation guidance provided by Legacy partners. Legacy Roundtable is sponsored by the Council of African American Parents, a non-profit organization.
