

# Your Son Can Excel at Math

2018 CAAP  
Legacy Roundtable Accelerated  
Mathematics Academy

# 2018 CAAP Legacy Roundtable Accelerated Mathematics Academy

Proficiency in math is one of the most important skills a young student can obtain. If a career in Science, Technology, Engineering or Math is a student's dream, participating in the Legacy Roundtable Mathematics Academy is a must.

Through this rigorous program, students will:

- ➔ **Work with highly skilled UCR student tutors to gain math proficiency**
- ➔ **Improve study skills**
- ➔ **Prepare for STEM careers**
- ➔ **Reinforce cultural connections**

## ORIENTATION/REGISTRATION

**Nov. 18, 2017 | 9am-12pm**  
**University of California, Riverside**

## TUTORING SESSIONS

**Saturdays from Feb. 10-May 12, 2018 | 9am-12pm**  
**University of California, Riverside**

Students will work with trained tutors on their current math coursework and to prepare for community college math assessment tests.

**Success requires commitment. Students must attend every session to remain in the program.**

During these Saturday sessions, parents will have the opportunity to attend important informational workshops to help get their child college-ready:

- **Admissions/Academic Advisement**
- **Financial Aid/Scholarships**
- **Housing**
- **Undergraduate Admissions**

## SUMMER COURSES

Based on the results of their community college math assessment tests, students will take a six-week advanced math course taught by community college professors at one of the following campuses:

**Chaffey College | Moreno Valley College**  
**Mt. San Antonio College | Mt. San Jacinto College**

These classes will replace a full-year high school math requirement and allow students to enroll in a more-rigorous math class when they return to school in the fall.

Online math courses are also available. Dates and times for summer courses will vary. Visit [caapsc.org](http://caapsc.org) for more details.

## ENRICHMENT PROGRAMS

Students also have the opportunity to participate in programs that further prepare them for STEM success:

- **College Tours**
- **Community College Presentations**
- **Community Service**
- **Test Preparation**

## COST:

**\$100**

Annual Family CAAP membership fee

**\$100**

Legacy Roundtable fee per student

Scholarships may be available and are based on need

The care and concern demonstrated by the entire tribe of support offered through Legacy as well as CAAP for these past three years has been invaluable ... the mentoring, the math support, the collegiate experiences and the relationships have been life changing. Ms. Johnson, Mr. Moore and Mr. Roberson have 'gathered' my son, Jaylan, within their net and have been a crucial part of 'growing him' in a way that is in support of how my husband and I are guiding his development; yet, separate enough to where he could hear when he may not listen to us. It's so much more than math ... it's everything! Legacy may not be for every Black young man, but it WILL impact most! It has been well worth EVERY minute and dollar we've invested ... Legacy and CAAP have truly made an INDELIBLE mark on the Iverys!
